

# SeaGrowth

- Stimulates plant growth, flowering and fruit production.
- Increases beneficial soil microbes and improves soil health.
- Increases the water holding capacity of soils

APPLICATION	RATE/ DILUTION	NOTES
Nurseries- germination, transplant, cuttings	1:200 dilution 20mL per 4 Litre	Seeds may be soaked 24hs. Treat plants and cuttings every 7-14 days
Gardens- all plants and lawns	1:200 dilution 20mL per 4 Litre	Spray foliage and soil every 14 days.
Pasture	10L/ha	Apply before spring and autumn flush with sufficient water to cover
Broadacre and Field Crops	10L/ha 2 x 5L/ha	Apply to soil or crops pre and post flowering. Adjust filters and nozzles

## ANALYSIS

Patassium	3.4%
Sulphor	0.8%
Solids	9.5%

**PRODUCT DESCRIPTION:** **SeaGrowth** Seaweed Concentrate is an all natural extract of Australian cold water seaweed (*Durvillea Potatorum*) and contains all the beneficial ingredients found in seaweed including auxins which promote growth and root development, cytokinins for seed germination, budding and flowering, gibberellins for cell division and a high concentration of complex sugars or oligo-alginates that simulate plant growth, feed beneficial soil microbes and hold up to 300 times their weight of water, thereby increasing the water holding capacity of soils.

**DIRECTIONS FOR USE:** Apply to leaves, flowers or soil once diluted with water. Do not store once diluted. Keep away from direct heat of sunlight. Apply through high volume low pressure sprayer or watering can to avoid nozzles blocking.

**PRECAUTIONS:** **SeaGrowth** Concentrate is not hazardous and non toxic to plant and animal life. Not registered for animal consumption.
