

ECTOL STARTER

Crop nutrient for direct incorporation with seed or foliar application

General Information: Ectol Starter is a mixture of protected Phosphorus, Nitrogen and Potassium that is safely applied in furrow or sprayed onto crops as a foliar application. It will not "burn" sensitive seeds or seedlings. The Phosphorus complex avoids immobilisation and lock-up of Phosphorus in acid or alkaline soils and reduces the loss on Nitrogen from leaching and Phosphorus as run-off.

Recommendations: For application to the soil providing immediate nutrients on germination, to emerging seedlings and ongoing nutrients to crops.

Compatibility: Can be mixed with crop protection and herbicide products subject to a jar test.

Storage and Handling: Store under cover and out of direct sunlight. Contents may settle so mix before using. Best used within 12 Months of purchase. Non toxic and non inflammable. Avoid contact with skin and eyes. Avoid breathing spray and mist.

Application: Add Ectol Starter to sufficient water to achieve cover.

ANALYSIS		
14:12:2		
Total Nitrogen	14%	Humates
Total Phosphorus	12%	Fulvates
Total Potassium	2%	Lignosulphonates
Molybdenum	0.0005%	Kelp
Boron	0.025%	

CROP	RATE/DILUTION	NOTES
Cereal Crops, Legumes, Pulses, Maize	10L/ha to 50L/ha	As determined by the crop requirements, drill with seed or spray leaves.
Pasture, Turf	20L/ha	Spring and Autumn spray applications.
Potatoes	10L/ha to 50L/ha	Apply in furrow or post emergence.
